Adrian Fontanilla

Technical Program Management | Platform Engineering | Cross-Functional Leadership

Chicago, IL • adrianfontanilla@gmail.com • 213-448-1152 • linkedin.com/in/adrian-f-8a722022a

SUMMARY

Engineering leader and technical translator with a track record of bridging engineering, product, and executive stakeholders to drive roadmap strategy, cross-functional execution, and platform delivery. Progressed from Software Developer to Chief Operating Officer while remaining hands-on with cloud infrastructure, CI/CD, and production support. Skilled at scoping complex technical initiatives, surfacing risk early, and turning engineering tradeoffs into decisions non-technical leaders can act on.

CORE COMPETENCIES

Engineering Operations: Agile/Scrum · Release Management · Cross-Functional Leadership · Stakeholder Management · Team Scaling
People Leadership: Technical Hiring · Interviewing · Developer Onboarding · Mentoring · Performance Management
Technical Program Management: Roadmap Planning · Cross-Functional Delivery · Design Reviews · Risk Management
Cloud & DevOps: GCP · Docker · GitHub Actions · CI/CD · Firebase
Software Development: Next.js · React · TypeScript · Python · Node.js · REST APIs · Tailwind CSS

EXPERIENCE

Opes Associates (formerly Tern Computers) — Remote (HQ: New York, NY) | Chief Operating Officer | 2024–2026

- Directed engineering operations and Agile delivery across a cross-functional team of 15+ spanning frontend, backend, QA, DevOps, and security; interviewed and evaluated technical candidates, onboarded and mentored developers, managed workload and performance, and ran sprint planning, release management, and cross-team coordination.
- Drove the engineering roadmap in partnership with founders and board members, leading architecture discussions around migrating to a monorepo, shared authentication, CI/CD deployment strategy, and cloud infrastructure while evaluating technical tradeoffs and allocating resources to deliver three website iterations and two major TIDAL releases.
- Maintained hands-on technical ownership — contributing to frontend development, production troubleshooting, and deployments, including integrating proprietary G API and Tern API services into TIDAL's compiler sandbox.

HV Rebar — Manila, Philippines | Software Developer | 2022–2023

- Developed a production order management application to record and process metal bar orders and coordinate logistics to delivery locations, delivering the full solution from architecture through implementation.
- Built additional desktop and web applications using React, Node.js, Express, Electron, and MongoDB; participated in architecture discussions and stakeholder requirements gathering.

The Design People — Manila, Philippines (HQ: Los Angeles, CA) | Software Developer Intern | 2022

- Contributed to frontend application development within Agile software teams using React, Redux, PostgreSQL, Node.js, and Express.
- Led daily scrum meetings and coordinated designer-developer communication; participated in sprint planning, feature delivery, testing, and deployment.

The Odeon Restaurant — New York, NY | Head Bartender / Senior Server | 2009–2021

- Trained and mentored bartending staff at a high-volume New York restaurant, developing hands-on leadership and team development skills over 12 years.
- Built communication, conflict resolution, and client-facing skills that translated directly into engineering team leadership and stakeholder management.

PROJECTS

AI-Assisted Pull Request Review Workflow

- Designed and implemented an AI-assisted pull request review workflow using GitHub Actions, local LLMs, and Jira to improve review consistency, accelerate feedback cycles, and streamline engineering delivery.

Counting House Bookkeeping Website

- Designed and developed a production website for a bookkeeping firm, partnering directly with the client from requirements through deployment.

EDUCATION

Zuitt Coding Bootcamp — Full Stack Web Development
University of Southern California — Bachelor of Music
